## PROJECTS AND EXPERIENCE

---

### Personal Portfolio Website | JavaScript, HTML, CSS, Bootstrap

[github](#) • [live](#)

*A landing page designed to introduce my professional self.*

Utilized Bootstrap's architecture, CSS styling, and HTML syntax to implement a stylish and responsive online resume. Hosted using gh-pages.

### ES6 Asteroids | JavaScript, HTML, Canvas, CSS

[github](#) • [live](#)

*Fun arcade game of survival featuring a spaceship, asteroids, and bullets.*

Designed and implemented a recreation of the classic arcade game Asteroids through build tools such as webpack and babel. Hosted using gh-pages and made come to life through HTML, Canvas, and ES6 JavaScript.

### ES6 Snake | JavaScript, HTML, CSS

[github](#) • [live](#)

*A snake and apples populate a board while the snake seeks to divide and conquer all apples.*

Exercised HTML, CSS, and ES6 fundamentals with webpack and babel build tools. Auto starts the game and tracks your score, relaying it in an alert when the game ends.

## SKILLS SUMMARY

---

JavaScript • React.js • jQuery • HTML • CSS • git • Ruby • Ruby on Rails • SQL • Canvas

## EDUCATION

---

University of California, Davis  
B.S., Managerial Economics

Davis, California
