PROJECTS AND EXPERIENCE

ES6 Asteroids   **github • live**

Fun arcade game of survival featuring a spaceship, asteroids, and bullets.

Designed and implemented a recreation of the classic arcade game Asteroids through build tools such as webpack and babel. Hosted using gh-pages and made come to life through HTML, Canvas, and ES6 JavaScript.

ES6 Snake   **github • live**

A snake and apples populate a board while the snake seeks to divide and conquer all apples.
Exercised HTML, CSS, and ES6 fundamentals with webpack and babel build tools. Auto starts the game and tracks your score, relaying it in an alert when the game ends.

SKILLS SUMMARY

JavaScript • React.js • jQuery • HTML • CSS • git • Ruby • Ruby on Rails • SQL • Canvas

EDUCATION
